

Subject: New Building "Topped Out"

On Tuesday, March 8th, the steel erection of our new office building was finished and topped out as per tradition with an American flag and a tree.

All of this erection was accomplished during snowy and wet winter weather thanks to the general contractor, PJ Dick; steel fabricator, Kinsley; the erector, Century Steel; and of course the Local 3 Iron Workers. The efficiency of this operation is a testament to what is right in American private industry – manufacturing to exact dimensions, excellent operational planning, and the highest quality work force.

Thanks for a great start to our new building.

John K Applegath

VP Operations – Range Resources
